

SCHOOL ATTENDANCE AREAS

The board will determine attendance areas for the various schools of the district, considering recommendations of the superintendent and principal. In recommending attendance areas, the administrators will take into consideration the best use of school facilities, equalization of enrollments in classrooms, natural barriers, traffic hazards, and patterns and economy of operation. Except as the foregoing factors influence attendance areas, the areas established should permit students to attend the school nearest his place of residence.

Students are expected to attend the school in the area in which they live, with such individual exceptions as fall within board assignment policy or may be made in the best interests of the student or the school.

Individual school attendance areas may be revised as necessary.
